Close the Door on Cybercrime: Securing SaaS Data

Presented by:

Don Ritzman
Chief Marketing Officer, Whitenoise Systems

September 10, 2008

Welcome

- Housekeeping
 - All phones are set on mute
 - If you have a question, please use the Question and Answer box located below the presentation panel
 - We will collect questions throughout the webinar and answer as many as we can at the end
 - Questions we can't get to will be answered via email
 - There's a full-screen button on your screen that you can use to toggle between a full-screen view (for a larger image) and the view where you can see your Q&A box and type in questions – you can use it throughout the webinar

Introducing Don Ritzman of Whitenoise Systems

- Chief Marketing Officer for WhiteNoise
- Career spans 30 years including engineering, business development, and sales and marketing with positions at Fairchild Semiconductor, GE, Sun Microsystems, WAM!NET and Global Crossing
- Last 10 years focused exclusively developing practical data protection solutions to help thwart cyber-theft
- 2006 - awarded the Congressional Medal of Distinction for his unyielding commitment to help businesses fight cyber-crime, his outstanding leadership in business as the California Chairman of the Business Advisory Council and his contributions to the local economy
