OPSOURCE ACQUIRES EYT MANAGED SERVICES GROUP

Company Completes Second Acquisition in Four Months and Adds 12 Customers to Strengthen Position as Leading Provider of IT Infrastructure Services to Global 2000 Companies

SANTA CLARA, Calif., and CHANTILLY, Va., -- March 5, 2003 -- OpSource, Inc., a next-generation IT infrastructure services company, announced it has acquired the Managed Services Group of EYT, Inc. (originally formed as Ernst & Young Technologies) one of the top five Microsoft Business Solutions Partners in the country. With this announcement, OpSource will increase its managed services customer base, strengthen its business operations in the mid-Atlantic region and create a strategic alliance with one of the leading business solution integrators. For EYT, this acquisition furthers efforts to align business operations with the company's mission to become the premier provider of Microsoft Business Solutions (MBS) and Services to the mid-market.

Under the terms of the agreement and effective immediately, OpSource will assume full responsibility for EYT's existing managed services customers as well as EYT's corporate Internet infrastructure www.eyt.com. OpSource will provide 24x7 customer care, hosting, bandwidth provisioning, security, and database and application management services to EYT's managed services customers, which include automotive, higher education, financial services, and healthcare organizations. The two companies expect the transition to be completely transparent to the customers.

"As our business priorities evolved, we knew that a company focused solely on providing managed services with experience taking over complex IT infrastructure operations was the right solution to fulfill our commitment to our managed services customers," said Barry Culman, president and CEO of EYT. "OpSource is a well-funded private company with experienced senior management, established tools and best practices which has led well-known Fortune 500 companies to select them for IT infrastructure services. They are the best choice for delivering the high quality services our customers have come to expect."

OpSource Acquires EYT Managed Services Group

“We are pleased with the opportunity to provide the managed services these companies require and look forward to proving the value a company 100% focused on delivering operational excellence of IT infrastructure services can provide,” said Treb Ryan, CEO and co-founder of OpSource.

Acquisition Strategy Key to Delivering Value in Today’s Challenging Economy

In today's economic environment, some of the best opportunities to create value for customers, employees and shareholders are through the consolidation of services assets. In addition to EYT’s Managed Services Group, OpSource acquired Accelica, a leading managed services provider (MSP) based in California, in November 2002. In just six months time, through two acquisitions and organic sales efforts, the company has grown to 27 customers, more than 55 employees, and operations in four U.S. metropolitan markets.

“Anticipating that a merger and acquisition strategy would be important to our growth in today’s market, we built a technology infrastructure optimized to facilitate and manage integration of new technologies, front-office and back-office systems, and, most importantly, maximize the efficiency of our personnel,” said OpSource CEO Ryan. “As a result, we are well positioned to grow our business through acquisitions, without sacrificing quality.”

About EYT

As a Gold Certified Partner for both Microsoft® Business Solutions and Microsoft technology solutions, EYT - formerly Ernst & Young Technologies - offers mid-market clients a unique combination of business application and technology solution expertise. EYT's experienced professionals, custom development, and vertical industry expertise accelerate deployment of tailored solutions built on the leading business management applications from Microsoft including Great Plains, Solomon and CRM. EYT is headquartered in Chantilly, VA, with additional operations in the U.S. and Canada. For more information about EYT, visit the company’s web site at <http://www.eyt.com>.

About OpSource

OpSource is a next-generation IT infrastructure services provider to Global 2000 companies. The company combines innovative technologies, proven processes and experienced people to create services that are flexible enough to suit a company’s specific business needs and yet deliver real, predictable and measurable value to a company’s business operations. OpSource is 100% focused on delivering IT infrastructure services so its customers can confidently enter into long-term relationships without fear that service quality will suffer due to tradeoffs with other lines of business or, worse, be left stranded as company priorities and interests change. The company is headquartered in Santa Clara, CA with additional operations in Los Angeles, New York City and Chantilly, VA. For more information about OpSource, visit the company’s web site at <http://www.opsources.net>.
