Keane BRMS Selects OpSource On-Demand to Deliver its Web-based Enterprise Risk Management Tool

OpSource On-Demand Optimizes Keane SCORE Application Performance, Data Security, and Customer Support

SANTA CLARA, Calif., August 13, 2007 – OpSource™, the SaaS delivery experts, announced that The Keane Organization's Business Risk Management Solutions (BRMS) division has selected OpSource to deliver Keane SCORE, a patent-pending, Web-based decision-support tool that automates the key components of enterprise risk and compliance management: measurement, management and monitoring. Businesses rely on Keane SCORE to automate and streamline key functions required to accomplish and maintain compliance in real-time, requiring non-stop availability and optimal application performance.

By choosing OpSource to deliver its Keane SCORE solution, Keane BRMS is guaranteed 100 percent system uptime, the highest levels of security, SAS 70 Type II audited processes and procedures, collaborative application management, performance monitoring and 24x7 end-user support. As a result, Keane BRMS can assure its customers that the entire Keane SCORE application environment and infrastructure meets its high standards for quality and efficiency and delivers the responsive, accurate results needed for cost-effective enterprise risk management.

Schon Hubeny, vice president of Keane BRMS, said, "Our business and our solution have both matured to a point where we needed a more complete set of services than what a typical hosting company provides. We've developed a bulletproof on-demand solution for comprehensive risk management, and our customers expect it to be delivered in a bulletproof business technology environment. OpSource is a rare breed of company that truly understands what it takes to achieve this. Their 100 percent uptime guarantee and SAS-70 certification were definitely key factors and fundamental requirements; but OpSource goes well beyond the basics by also providing a 24x7 call center, self-service portals, built-in monitoring, proactive issue resolution, and application management. OpSource also embraces a collaborative working relationship that's extremely valuable in helping us deliver a quality solution."

Treb Ryan, chief executive officer of OpSource, said, “On-demand companies are turning to OpSource for Web application delivery as their businesses evolve, because we offer the breadth of services and economies of scale that enable them to expand globally—and do it very cost-effectively. Keane BRMS is a great example of an on-demand enterprise that needs to meet high standards of quality and service. This requires a true partnership that redefines managed hosting. We’ve created a business model whereby, as a Web application delivery provider, we truly understand our customer’s business. We align ourselves operationally and financially with our customer’s goals and provide a complete Web application delivery solution. We do whatever it takes to insure we deliver on the promise that ‘our customer’s success is our success’.”

About OpSource On-Demand

A comprehensive, award-winning Web application delivery platform, OpSource On-Demand enables companies to quickly and securely offer applications on-demand. OpSource On-Demand is the only complete platform for Web application delivery, offering a best-in-class, fully scalable software, hardware and network infrastructure, including application management and 24x7 customer-branded end user support and a 100% uptime guarantee. In addition, OpSource On-Demand includes tools that accelerate revenue generation, such as billing and analytics. OpSource is the only company to offer Success-Based PricingSM, a unit-based pricing model that allows businesses to begin with a modest minimum commitment and scale expenses as revenues increase.

About Keane BRMS
