eBillingHub Selects OpSource On-Demand to Scale to Growing Business Demands

Delivers electronic billing service for law firms to improve cash flow

SANTA CLARA, Calif. – March 19, 2008 – OpSource[™], the SaaS delivery experts, today announced that eBillingHub, the market leader in simplifying electronic billing for law firms, has selected OpSource On-Demand[™], the leading Web operations solution, to deliver its Web-based SaaS ebilling and invoicing solution for law firms. eBillingHub made the decision to move from a traditional hosting provider to OpSource in order to meet the demands of its rapidly increasing business and to satisfy the compliance requirements of global law firms dealing with complex billing situations.

eBillingHub found the virtualization scalability and reliable managed services that are core to the OpSource On-Demand solution paramount when considering a SaaS application delivery solution. In addition, OpSource's focus on compliance and meeting Sarbanes Oxley standards is particularly important. OpSource On-Demand is Statement on Auditing Standards Number 70 (SAS 70) Type II audited, Level 1 PCI DSS compliant and includes a 100 percent uptime guarantee, all of which are necessary to support eBillingHub's business-critical applications.

eBillingHub CEO Greg Coticchia said, "We are dealing with very sensitive data that requires our clients trust the solution we have in place for them. In evaluating our SaaS alternatives, we concluded that in order to ensure business continuity OpSource, with its 100 percent availability guarantee and focus on compliance, sets the standard for SaaS best practices in the key areas of security, performance and reliability."

The eBillingHub helps law firms speed up the collections process and reduce the complexity of electronic invoice submissions, eliminate billing backlogs and common submission errors and minimizes or eliminates the need for additional staff to administer electronic billing. For law firms, using the eBillingHub results in improved cash flow, increased partner distributions and enhanced client service. Architecturally,

the eBillingHub is built on a service-oriented architecture (SOA), utilizing Web services standards for its integration with practice management systems such as Thomson Elite and ProLaw, ADERANT, RainMaker and others.

OpSource CEO Treb Ryan said, "We recognize the tremendous growth in the eBilling and invoicing industry and in particular eBillingHub's market. eBillingHub has emerged as the leader in providing law firms with on-demand solutions which can scale to as their growth continues. We're pleased that our investment in ensuring OpSource On-Demand meets the stringent compliance standards required by eBillingHub and excited to be a part of this growth opportunity."

About OpSource

OpSource delivers Web applications and software-as-a-service for on-demand companies, with hundreds of applications, millions of users and billions of transactions supported daily. OpSource On-Demand, the leading platform for Web application delivery, is defining how Web-based software is delivered. By choosing OpSource as their Web application delivery partner, companies are freed from investing in and managing the complex and costly infrastructure and services necessary to deliver applications over the Web. They can instead focus their resources on developing, marketing and selling their applications and services. OpSource On-Demand is suitable for companies at any stage of growth, with any type of on-demand application. OpSource is the only company to offer Success-Based PricingSM, a unit-based pricing model that allows businesses to begin with a modest minimum commitment and scale expenses as revenues increase.

Headquartered in Santa Clara, CA, OpSource has Web application delivery centers in Virginia, London and Bangalore. For more information about OpSource, visit www.opsource.net.

About eBillingHub®

eBillingHub delivers simplified electronic billing for law firms worldwide, making it possible for firms to eliminate costs and improve cash flow as they grow their electronic billing volume. The company's patent-pending technology, delivered as Software as a Service (SaaS), provides a comprehensive and collaborative approach for preparing, tracking, submitting and managing the electronic billing process. Unlike tools used by law firms to create LEDES invoice files, the eBillingHub simplifies the electronic billing process by integrating a law firm's time and billing software with multiple electronic billing vendors, which are often specified by a firm's clients.
