**iAct Selects OpSource to Enable StageGold.com's
Video Publishing and Sharing Services**

*OpSource's Scalable Virtual Network Allows iAct to Deliver On-Demand Solution for
Collecting, Uploading and Publishing Videos*

Santa Clara, Calif., – June 16, 2008 – OpSource[™], the leader in Web operations, today announced that iAct, a social networking site for active individuals, has chosen OpSource On-Demand[™] to enable StageGold.com, its free video sharing and hosting site. Using OpSource On-Demand, StageGold.com empowers its one million-plus users to manage their online videos in a secure and scalable environment.

iAct chose OpSource On-Demand for its unmatched scalability, performance and support. With a quickly growing user base, StageGold.com is a new video hosting and branding site that provides online tools for publishing and sharing videos on the Internet. Users upload their videos with StageGold.com's upload manager, or collect links of their favorite videos from elsewhere on the Web. Breaking away from traditional video sites, StageGold.com provides a unique online Skinbuilder that empowers users to create their own custom-branded video players and then publish videos and playlists inside their own video players to any Internet site, blog or social network.

Alan Larsen, CEO of iAct, said, "OpSource impressed us with its ability to provide a scalable virtual network with a superior focus on support, quality and dependability. Before we switched to OpSource, we had followed a more traditional approach of shared and dedicated servers. Working with OpSource has made it much easier to focus on our business of delivering unique branded video solutions."

Treb Ryan, CEO of OpSource, said, "We are proud of our ability to provide our customers across all industries with the most secure and stable on-demand services on the market. We see tremendous growth opportunities for SaaS as a whole and OpSource On-Demand in particular as social networking thrives and online video gains more momentum every day."

About OpSource On-Demand

- Application [analytics](#) that offer insight into the performance and usage of the on-demand application
- The industry's only Success-Based PricingSM, a unit-based pricing model that allows businesses to begin with a modest minimum commitment and scale expenses as revenues increase

About OpSource

OpSource™ delivers Software-as-a-Service (SaaS) and Web applications for on-demand companies, with hundreds of applications, millions of users and billions of transactions supported daily. OpSource On-Demand™, the leading Web operations solution, is defining how Web-based software is delivered. By choosing OpSource as their Web application delivery partner, companies are freed from investing in and managing the complex and costly infrastructure and services necessary to deliver applications over the Web. They can instead focus their resources on developing, marketing and selling their applications and services. Further, by using OpSource Connect™ companies can leverage Web services such as OpSource Billing™, OpSource Analytics™ and OpSource End-User Support™ and integrate their applications with other SaaS applications over the Internet as well as with enterprise applications behind the corporate firewall. OpSource On-Demand is suitable for companies at any stage of growth, with any type of on-demand application. OpSource is the only company to offer Success-Based PricingSM, a unit-based pricing model that allows businesses to begin with a modest minimum commitment and scale expenses as revenues increase.

Headquartered in Santa Clara, CA, OpSource has Web application delivery centers in Virginia, London and Bangalore. For more information about OpSource, visit www.opsource.net.
